Medical Engineering Technician

Job Ref: SWM818MET

Employer: Southwest Medical Ltd

Location: Bristol

Salary: Commensurate with qualifications, skills and experience. The position is subject to an initial 3 month trial period.

Overview: *Southwest Medical Ltd* is an established Medical equipment service company within the human and veterinary industry. We are looking for a highly motivated, qualified and experienced biomedical engineer to join our team.

Requirement: You should be qualified to a minimum of **HNC** level or equivalent, with at least three years biomedical servicing experience. The candidate will be involved with the maintenance, repair and calibration on a wide range of complex electronic and mechanical medical equipment both in the workshop and on customer premises. Training will be provided where necessary but proven experience in infusion, patient monitoring and anaesthesia equipment is essential to the role. Whilst not essential, other desirable skills include autoclave, dental, electrosurgery and X-ray. Candidate must have experience of working to deadlines, set protocols and procedures.

Although infrequent, out of hours and overseas working may be required.

Please download Job Description for further details.

Person Specification: You should possess; good oral/written communication skills, be able to work as part of a team, self motivated and use own initiative. You should be fit and able to carry out duties, as required, be willing to undertake training relevant to the role and hold a full clean driving licence.

Application: Please apply in writing enclosing a current CV to the address below;
